MAXXUM

Case IH Maxxum has long been the name by which mid-range tractors are measured – a byword for tractors that are agile, frugal, strong and dependable. With models from 116 to 150hp and a range of transmissions including a 16F/16R four-speed powershift, our award-winning ActiveDrive 8 24F/24R eight-speed powershift that delivers class-leading fuel efficiency, or a CVXDrive for the ultimate stepless transmission, the Maxxum makes farming easier. What's more, as well as being named Machine Of The Year 2018 at Agritechnica, the Maxxum 145 Multicontroller has the lowest fuel consumption ever recorded for a four cylinder tractor in tests conducted by DLG, meaning less time spent filling up and more time working in the field.

PUMA

The Case IH Puma range has a well-established reputation. With fifteen models from 140 to 240hp and one or two door cab options to suit all of your needs, the Puma is available with a proven semi-powershift, full powershift or CVX continuously-variable transmission to suit your needs. Whatever the task, Puma delivers, with excellent fuel efficiency and premium ride comfort.

OPTUM CVX

The Case IH Optum CVX range is powerful, compact and highly manoeuvrable, with an excellent power-to-weight ratio.

This range has three models from 250 to 300hp and hauls large trailers economically and safely at up to 50 km/h on the road.

Structural engine sump gives a very high power to weight ratio with a large payload capacity, allowing you to add weight for heavy cultivation and remove it for top work.

With its stunning new design and eye-catching signature lighting this tractor will handle any task with maximum performance, efficiency and reliability.

FARMLIFT

**WHATEVER YOUR NEEDS,
THERE IS A FARMLIFT FOR YOU**

With a range of six models, with lift capacities from 2,500 to 4,200kg and a maximum lift height from 5m to 9.1m, whatever model you choose, you know you can count on a large, comfortable cab for the best operator environment. The Farmlift is available with either a 4 or 6 speed powershift transmission and open and closed centre hydraulics for efficiency and fast response times.

MAKING GREAT BALERS EVEN BETTER

LARGE BALERS

When you buy a Case IH baler you're guaranteed a rugged, robust and reliable machine, whichever model you choose.

Our new generation LB 4 large baler series features revisions and refinements throughout, to create machines even more productive than their predecessors, producing bales from 80x70 TO 120x90 CM. Each one is designed to make your baling more productive, more profitable and more of a pleasure.

ROUND BALERS

We know you need to be able to bale quickly and at a high and consistent density.

We've worked with customers to design our new range of round balers and have integrated a multitude of features into the new RB design so that every model is capable of following the largest combine or baling the heaviest crop with remarkable speed and efficiency. The bale size can be altered and monitored from the comfort of the tractor seat and the wrapping system is ultra-reliable – so there's no need to worry about the crop type or conditions... simply follow the swath. Ask your dealer about the wide range of fixed and variable chamber options available.
